- Languages :- HTML and HTML5, CSS and CSS3, Javascript, Responsive Designs,
- Tools :- Visual Studio Code, Git, Github, Notepad, Notepad++, MS word, Power Point.

## PROJECTS

---

### Amazon.com clone | [Click](#)

- Developed an Amazon.com clone using HTML and CSS to replicate the look and feel of the popular e-commerce platform.
- Implemented a responsive design to ensure a seamless user experience across various devices, including desktops, tablets, and smartphones.
- Successfully recreated the intricate page layout of Amazon.com, including the header, navigation, product listings, and footer sections.
- Applied detailed CSS styling to capture the visual aesthetics of Amazon, including fonts, colors, and other style elements.
- Maintained a well-organized code structure for both HTML and CSS.

### Flipping Aadhar Card | [Click](#)

- Developed an interactive Aadhar card component using HTML and CSS that incorporates a flipping animation for enhanced user engagement.
- Designed a well-structured HTML markup, ensuring it reflects the necessary components of an Aadhar card such as personal details, photograph, and Aadhar number.
- Implemented CSS styling to closely mimic the appearance of an official Aadhar card, paying attention to details such as fonts, colors, and layout.
- Created a realistic flipping animation using CSS transitions or transform styles to simulate the flipping action when interacting with the Aadhar card.
- Maintained a clean and organized code structure, adhering to best practices for readability and ease of maintenance.
- Incorporated interactive elements, such as hover effects or click triggers, to initiate the flipping animation and provide a dynamic user experience.

### Mahindra Thar Card | [Click](#)

- Developed an interactive and visually appealing card using HTML and CSS to showcase Mahindra Thar.
- Created a well-organized layout for the card, featuring sections for Mahindra Thar image, a tag line, and clickable information.
- Incorporated interactive hover effects, such as transitions, to enhance user engagement and provide an attractive look when interacting with the card.
- Utilized CSS flexbox to structure and position elements within the Mahindra Thar card layout efficiently.

### Gaming Console Advertisement | [Click](#)

- Developed an interactive single page website, an engaging game console advertisement using HTML, CSS, and JavaScript to showcase the product's features and appeal to the target audience.
- Ensured the advertisement is fully responsive, adapting seamlessly to various screen sizes and devices to cater to a diverse audience.
- Designed a structured and semantically meaningful HTML document, ensuring accessibility and proper organization of content.
- Implemented CSS styling to create a visually appealing and consistent design, aligning with the branding of the game console.
- Implemented JavaScript styling, ensuring accessibility of navbar on different screens.
